Bound to impress

- Unrivalled levels of presentation
- Documents open completely flat and stack neatly
- Simple push button operation
- Super strong binding which doesn't lose strength
- Binds 3-350 80gsm sheets in 10-25 seconds
- Choice of four binding styles

Fastback® high volume binding

Fastback[®] binding is quick, easy and economical. The results are great looking, hard working documents that open flat and stack neatly.

Perfect for plans, proposals, budgets - in fact any kind of document.

Operator training takes minutes, binding takes seconds and pages stay bound for years and years!

The Model 15xs binds from 3 to 350 sheets within 25 seconds and is designed, engineered and manufactured to meet the demands of professional binderies, quick printers and offices alike. Teflon coated plates keep maintenance and cleaning simple and the machine comes with a cooling rack that can be mounted on the binder itself, or can stand alone.

The process couldn't be simpler, just place your document in the machine, press the green button and feed in the appropriate strip. The Model 15xs will recognise your strip and automatically adjust the bind time to give you the strongest bind possible. No punching, no counting sheets, nothing to measure or calculate and no unsightly plastic or wire.

With the addition of the PowisPrinter[™] and Foilfast[™] Printer, you can even professionally print your document spines and A4 covers in seven vibrant colour foils.

Superstrip[™]

Our standard spine strip, designed to be combined with separate front and back covers. Available in 3 lengths, 3 widths and 16 colours. A4 & American Quarto in narrow, medium and wide - black, white, red, maroon, yellow, purple, teal blue, bright blue, lapis blue, dark blue, dark grey, light grey, jade, dark green, dark brown and light brown.

A5 in narrow, medium and wide - black, white and dark blue. *Virtually any covers can be used with Superstrip[™] - contact us for details of our full range.*

Comp Strip[™]

A leather effect spine strip for use with separate front and back covers. Available in A4, 3 widths and 6 colours. Narrow, medium and wide - dark green, dark blue, dark grey, maroon, white and black. *Comp Strip[™] colours exactly match the Comp Covers recommended for use with the Foilfast[™] Printer.*

Perfectback[™] Strip

There are three types of strips; Perfectback[™] LF, PS and TA, all designed to allow economic short run perfect binding (paperback book production). All available in A4 and 3 widths - narrow, medium and wide.

For more information please refer to our dedicated Fastback[®] perfect binding leaflet.

Speed Strip[™]

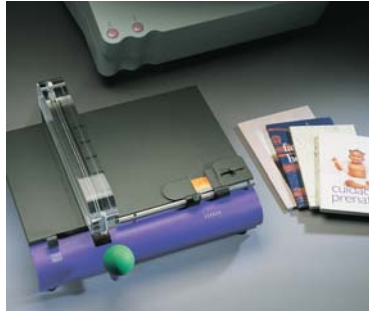

This strip is formulated to bind a book in approximately 10 seconds - faster than ever before! Available in A4, 3 widths and 4 colours. Narrow, medium and wide - black, white, dark blue and red.

Halfback[™] Covers

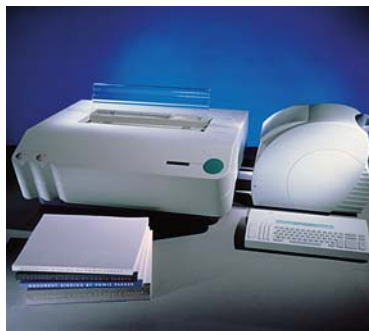

A spine and front cover in one piece, offering a seamless finish to the front of documents. Available in A4, 3 widths and 5 colours. Narrow, medium and wide - Smooth Finish in white, Linen Finish in white, black, dark green, dark blue and maroon.

Hardcover[™] Linen Strip

These strips are specially designed for Hardcover[™] binding. Available in A4, A5 & American Quarto and 3 widths - narrow, medium and wide. *Standard strips can also be used for Hardcover[™] binding. For more information please refer to our dedicated Fastback[®] hard back binding leaflet.*

Economical perfect binding for 1 or 1000 books with no set-up costs, no turnaround times and no waste

With the PowisPrinter[™] you can foil print a title, your name, company logo - in fact anything you want - onto the spine of your documents

Create instant impact by designing and printing your own foiled covers in house using the Foilfast[™] Printer
